

HIPON project

makes training a significant
online experience

Lifelong
Learning
Programme

co-financed by the Lifelong Learning Program of the
Education, Audiovisual and Culture Executive Agency
The Commission of the European Union

TARGET

medical students,
researchers & professionals

Major features of HIPON's platform

Our teaching approach is based on online case studies and interactive discussions through a well-structured and user-friendly, multi-language, e-learning platform which offers a valuable teaching instrument to acquire professional experience in pathology, taking advantage of modern image technology. The main characteristics of this modern pathology module consist of:

- 1 Guided learning courses reflecting highly pedagogical experience
- 2 Extended microscope high quality image collections
- 3 Educational videos
- 4 Relevant virtual slides on basic and systemic pathology

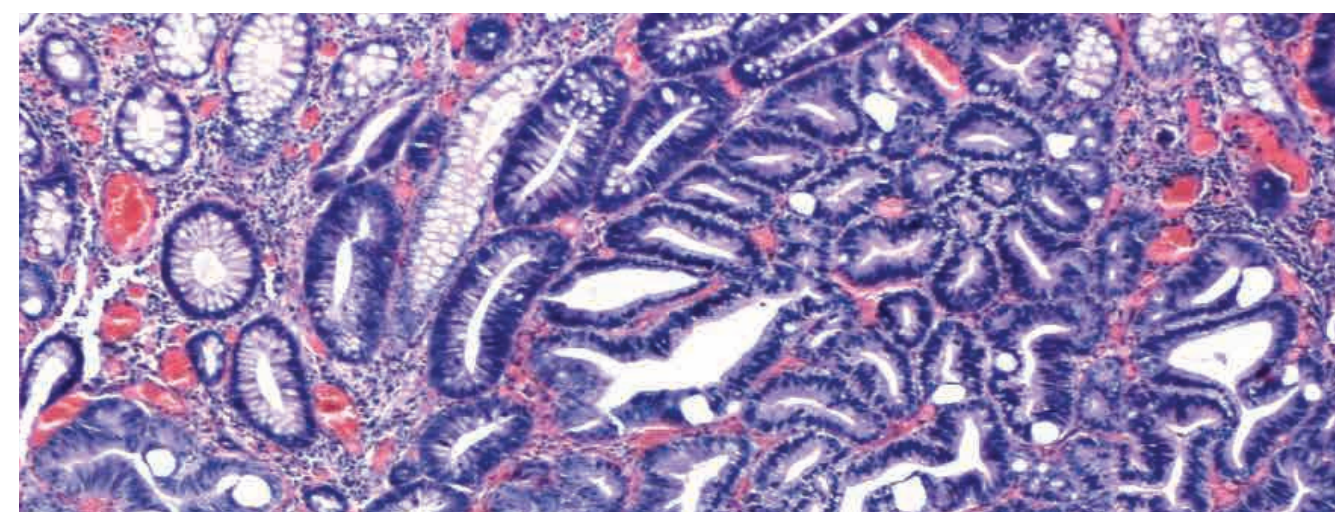

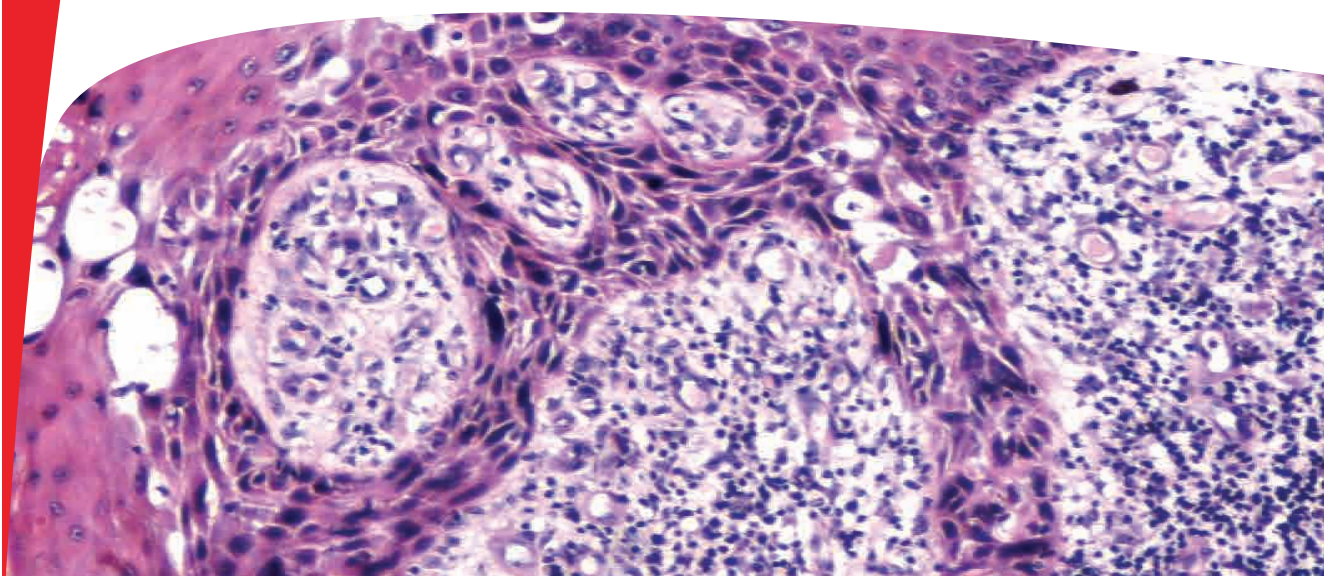

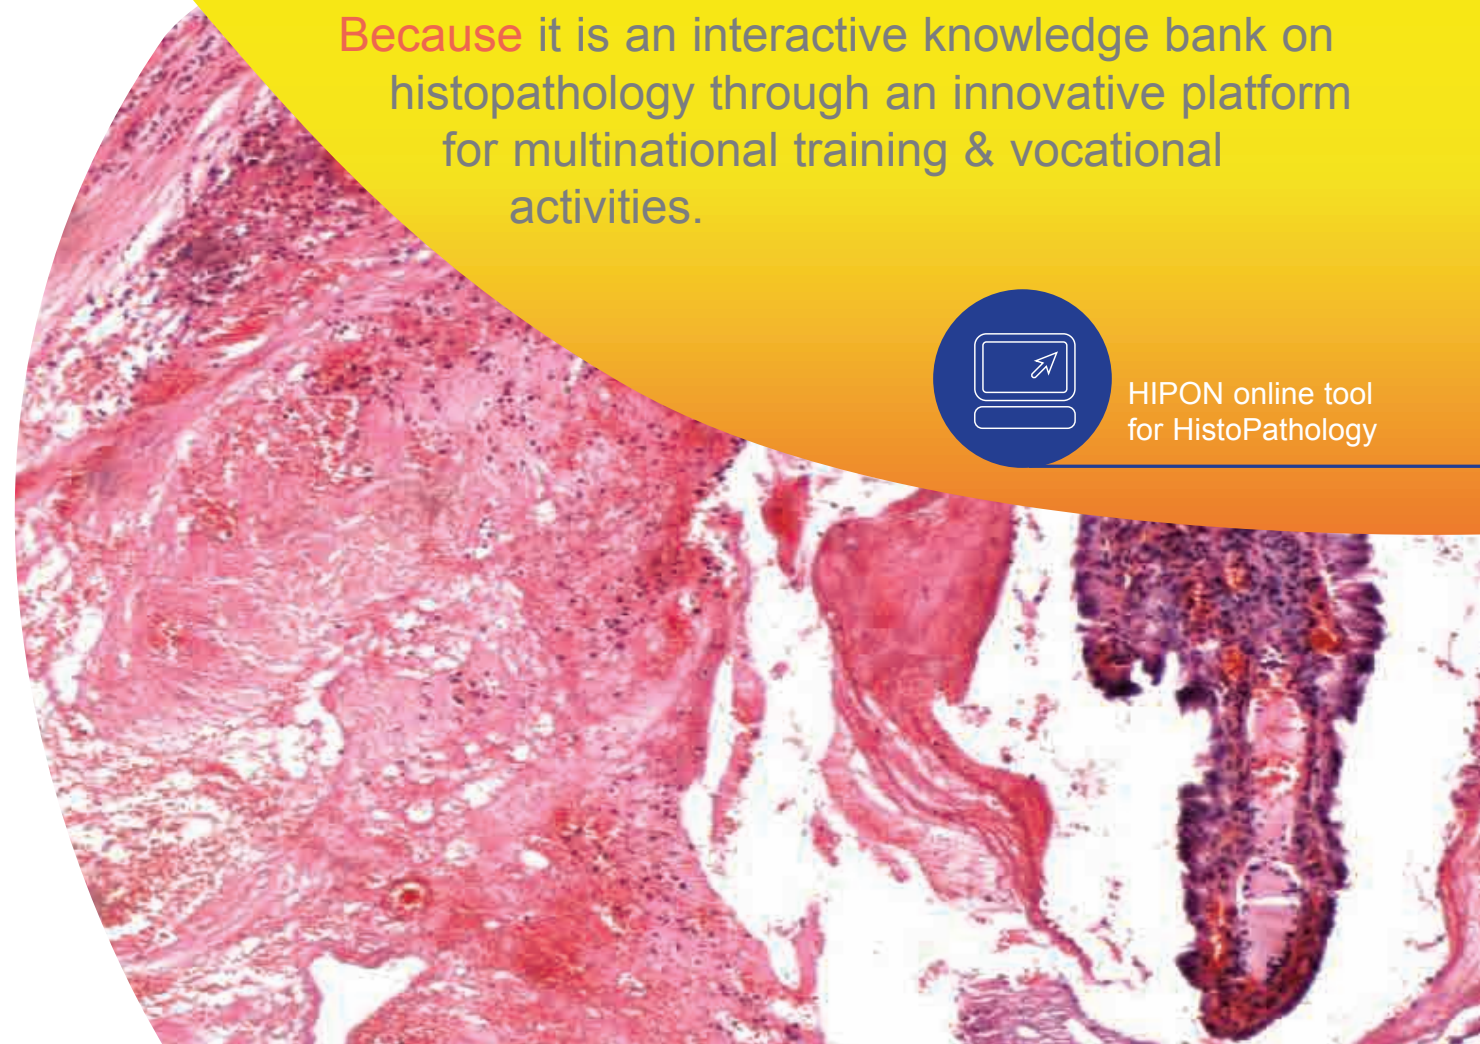

Why HIPON project?

Because this e-learning platform reflects professional experience and advances education in Histopathology by employing authentic learning approaches based on real-world problem solving and case studies.

Because it is an interactive knowledge bank on histopathology through an innovative platform for multinational training & vocational activities.

HIPON online tool
for HistoPathology

For the things we have to learn before we can do them, we learn by doing them.

Aristotle

HIPON web platform is based on **experiential** learning.
